

Australia's most universal USB mech

30 Series USB Charger Mech
30USBCM

Available at

Adaptable, efficient and reliable

Smartphones, tablets and portable music devices are designed to make your customers' lives easier and more comfortable. But, unique and bulky charger designs prevent them from simply plugging into the nearest vacant power outlet to recharge. That's where the Clipsal 30 Series USB Charger will change the way your customers charge their devices.

Your customers will be able to charge up to three electronic devices at a time, per wall plate, without the need for a power board or the manufacturer's original supplied charger. These energy-efficient USB Charger Mechs are compatible with both Apple® and Android™ devices, and use less than 0.07W of power while in Standby mode.

The 30 Series USB Charger Mech is available as an individual mech or in a variety of Clipsal Wall Plate combinations. Either way, the hardwired 30 Series USB Charger Mech will get your customers back using their devices, faster than ever!

Applications

Clipsal 30 Series USB Charger Mechs can be added to wall plates with switches and dimmers present; they are perfect next to bedside tables around the home or in hotel rooms. These versatile charger mechs can go anywhere, including schools, universities, airports and hospitals.

Up to three 30 Series USB Charger Mechs can be inserted into each Clipsal Wall Plate, so you can charge multiple devices simultaneously. They can be fitted into both standard and fire-rated wall boxes.

This USB Charger Mech is designed to fit into 30 Series aperture wall plates, in both bracket and wall box environments. With up to 1.2A of charge current available, its smart-charging technologies ensure devices such as phones, tablets, cameras and eBook readers can be charged at the maximum safe rate governed by the device.

Features and benefits

- 30 Series USB Charger Mech suits most Clipsal Switch Plate styles and colours, including Clipsal 2000 Series™, C2000™, Saturn™ Data, Slimline® and Standard.
- Fit up to three USB Charger Mechs per plate.
- Available as a single mech or in a variety of pre-assembled Clipsal Wall Plate combinations.
- Match coloured plates with compatible colour caps, to suit decor or identify type of power in a commercial environment.
- Able to be retrofitted, quickly, into Clipsal Wall Plates with 30 Mech apertures.
- Able to reduce overall system load and infrastructure by replacing standard GPOs with 30 Series USBs.
- Meets five-star energy ratings for efficiency with extremely low standby power (< 0.07W).
- Cable compensation allows devices to be charged quickly (compliant with USB Charging Specification BC1.2).
- Inbuilt protection for surge, over-temperature and over-current occurrences.
- Certified to all relevant safety and EMC requirements for Australia.

Product Specifications and Standards

Specification	Value/Description
Supply voltage	230V AC, nominal
Supply frequency	50Hz
Output voltage	4.75–5.25V DC
Output current	1.2A max. at 5.0V DC
Standby power	0.07W
Application	USB battery charger for portable USB devices
Mounting	Must be installed in an approved 30 Mech aperture grid or an adapter specifically designed for 30 Mech devices.
Location	Indoor use only. Can be placed with other USB charges, switches and dimmers in a 30 Mech grid plate.
Input connections	2-wire polarised input, includes screw-terminal connector. RED-active/line; BLK-neutral; lead length ~110mm.
Output connector	Standard USB socket
Grid compatibility	30 Mech aperture compatible. Specific compatibility as follows: 2000 Series – 2015X, 2015XX, 2025X* and up to 3-gang switch plates. C2000 Series – C2015X, C2015XX, C2025X* and up to 3-gang switch plates. SC2000 Series – SC2015X, SC2015XX and up to 3-gang switch plates. Standard Series – Up to 3-gang switch plates. Saturn – Up to 3-gang data plates. Strato Modena – With 30 Mech adaptor. Prestige – With 30 Mech adaptor. *Contact Clipsal by Schneider Electric for details on compatible clips, brackets and wall boxes. Only mounting hardware recommended by Clipsal by Schneider Electric should be used.
Dimensions	23mm (H) x 30.7mm (W) x 39.5mm (D)
Weight	30g
