

Dear Customer,

Over the last year we have faced increased raw material costs, human resource costs, insurance, rent, Forex and other operating costs. Whilst we attempt to offset these increases with productivity and efficiency improvements, the scale of these increases have made it necessary to review all of our pricing. A price increase of 5.9% will be implemented effective 21/01/2019 on all our standard products apart from two exceptions listed below.

- Spiral Guard, Fire Sleeves and Burst Busters ranges will have no price increase as these ranges were reviewed in August 2018
- All Nylon parts will have a price increase of 25% in line global raw material price increase

Essentra has and will continue to gain productivity improvements with our balanced growth and sensitive outlook on costs. Thank you for your past support and we look forward to assisting you now and in the future.

Yours Sincerely,

Nipun Abrol
