

Electrical and Mechanical Engineering Products

5 October 2017

## Price Review Notification

**To Our Valued Customers,**

We have, since our last increase in October 2015, insulated our customers from price rises that we have absorbed from our suppliers and freight companies. Fortunately, part of these increases have been offset by a stable Australian currency.

Unfortunately, we are no longer able to continue to absorb increases from our suppliers and are now obliged to review our prices across our product range.

Effective 1<sup>st</sup> November 2017, prices of all Mechtric products will increase by an average of 3.5%. Actual increases will vary from 0% to 10% according to product, manufacturer and country of origin.

Thank you for your understanding in this regard and we look forward to continue providing products and service to your business.

Revised price lists will issued over the coming weeks and will be available from your Mechtric representative on request.

Should you require further information please contact your Mechtric representative, State Manager or myself.
