Attention: Accounting & Purchasing Departments

On 1 May 2018, there will be a standard 6% price increase across our full battery range, including the Auscell sealed lead acid and deep cycle battery range. The only products not impacted by this price increase are our consumer alkaline battery range - prices will remain the same.

Purchasing costs have consistently increased for some time. We have been absorbing these increased costs, but purchasing costs continue to rise to the point we no longer can absorb the increases.

In addition, we have also seen a steady increase in shipping line costs and domestic freight charges.

As you would be aware, we have not increased our prices for two and a half years. I assure you the decision has only been made after careful consideration, as we can no longer wear these higher costs.

We will of course maintain our high standards of service to you, and look forward to our continued business relationship.

If you would like an updated price list, please do not hesitate to contact us on (08) 8262 4188 or email gbouras@olympicbatteries.com.au

Kind Regards,

George Bouras

Director

Olympic Batteries Pty Ltd
